New Product Press Release - for immediate release

Cambridge Connectors introduces Tape and Reeled options for coaxial connectors.

Precision 75 ohm 1.0/2.3, BNC, Min BNC and Micro BNC connectors are now available for use with industry standard Pick and Place equipment.

To meet the volume production practices of the Broadcast and Machine Vision industries, Cambridge Connectors now provides its 6 GHz and 3 GHz precision 75 ohm CoaxVision connectors in Tape and

Reeled packaging; provision is made for both standard and surface mount terminations. Not only are small format types such as DIN1.0/2.3; Mini BNC and Micro BNC catered for but also heavier and larger sized styles such as standard BNC. The connectors fully meet SMPTE 424M standards and are constructed to satisfy the high speed, high resolution video transmission requirements of 4K UHD Broadcast equipment and Coaxpress® Machine Vision applications. A flexible selection of reel sizes and widths is available to match a wide range of Pick and Place equipments.
