IP 67 Waterproof Coaxial Connectors for Broadcast Applications.

- IP 67 Waterproof
- Identical Interface to Standard BNC Connectors
- 3-G / 6G-SDI
- Right Angle; Edge Mount; Straight; Custom and Cable Mount Styles

Engineered for 3G / 6G-SDI High Speed, High Definition Broadcast applications these connectors are submersible to depths of up to 1 metre. This makes them ideal for use in demanding environments, such as in OB equipments being used in rugged settings. With an interface identical to industry standard BNC connectors, this range incorporates a screw locking feature which provides an additional safeguard against water and dust ingress. Available in Straight, Right Angle, Edge Mount PCB and Cable Mount styles; a waterproof Protective Cover completes the range. Custom versions tailored to meet specific requirements can also be produced.

With an impedance of 75 ohms and a typical Reflection Factor (VSWR) performance of 1.19 Max from DC to 6.25 GHz these connectors are ideal for High Speed video equipments used in demanding locations.

These IP67 connectors are available in a range of customised styles. To discuss your specific needs please contact our design team - see below for contact details.
